

SHOWS, PROMOTIONS, AND EVENTS

## HIGH MOBILITY

Having an **easy and quick to install** wind tunnel means it is possible to use it for different shows, promotions, and events. And we can install them in a way that does not make any damage to the surface.

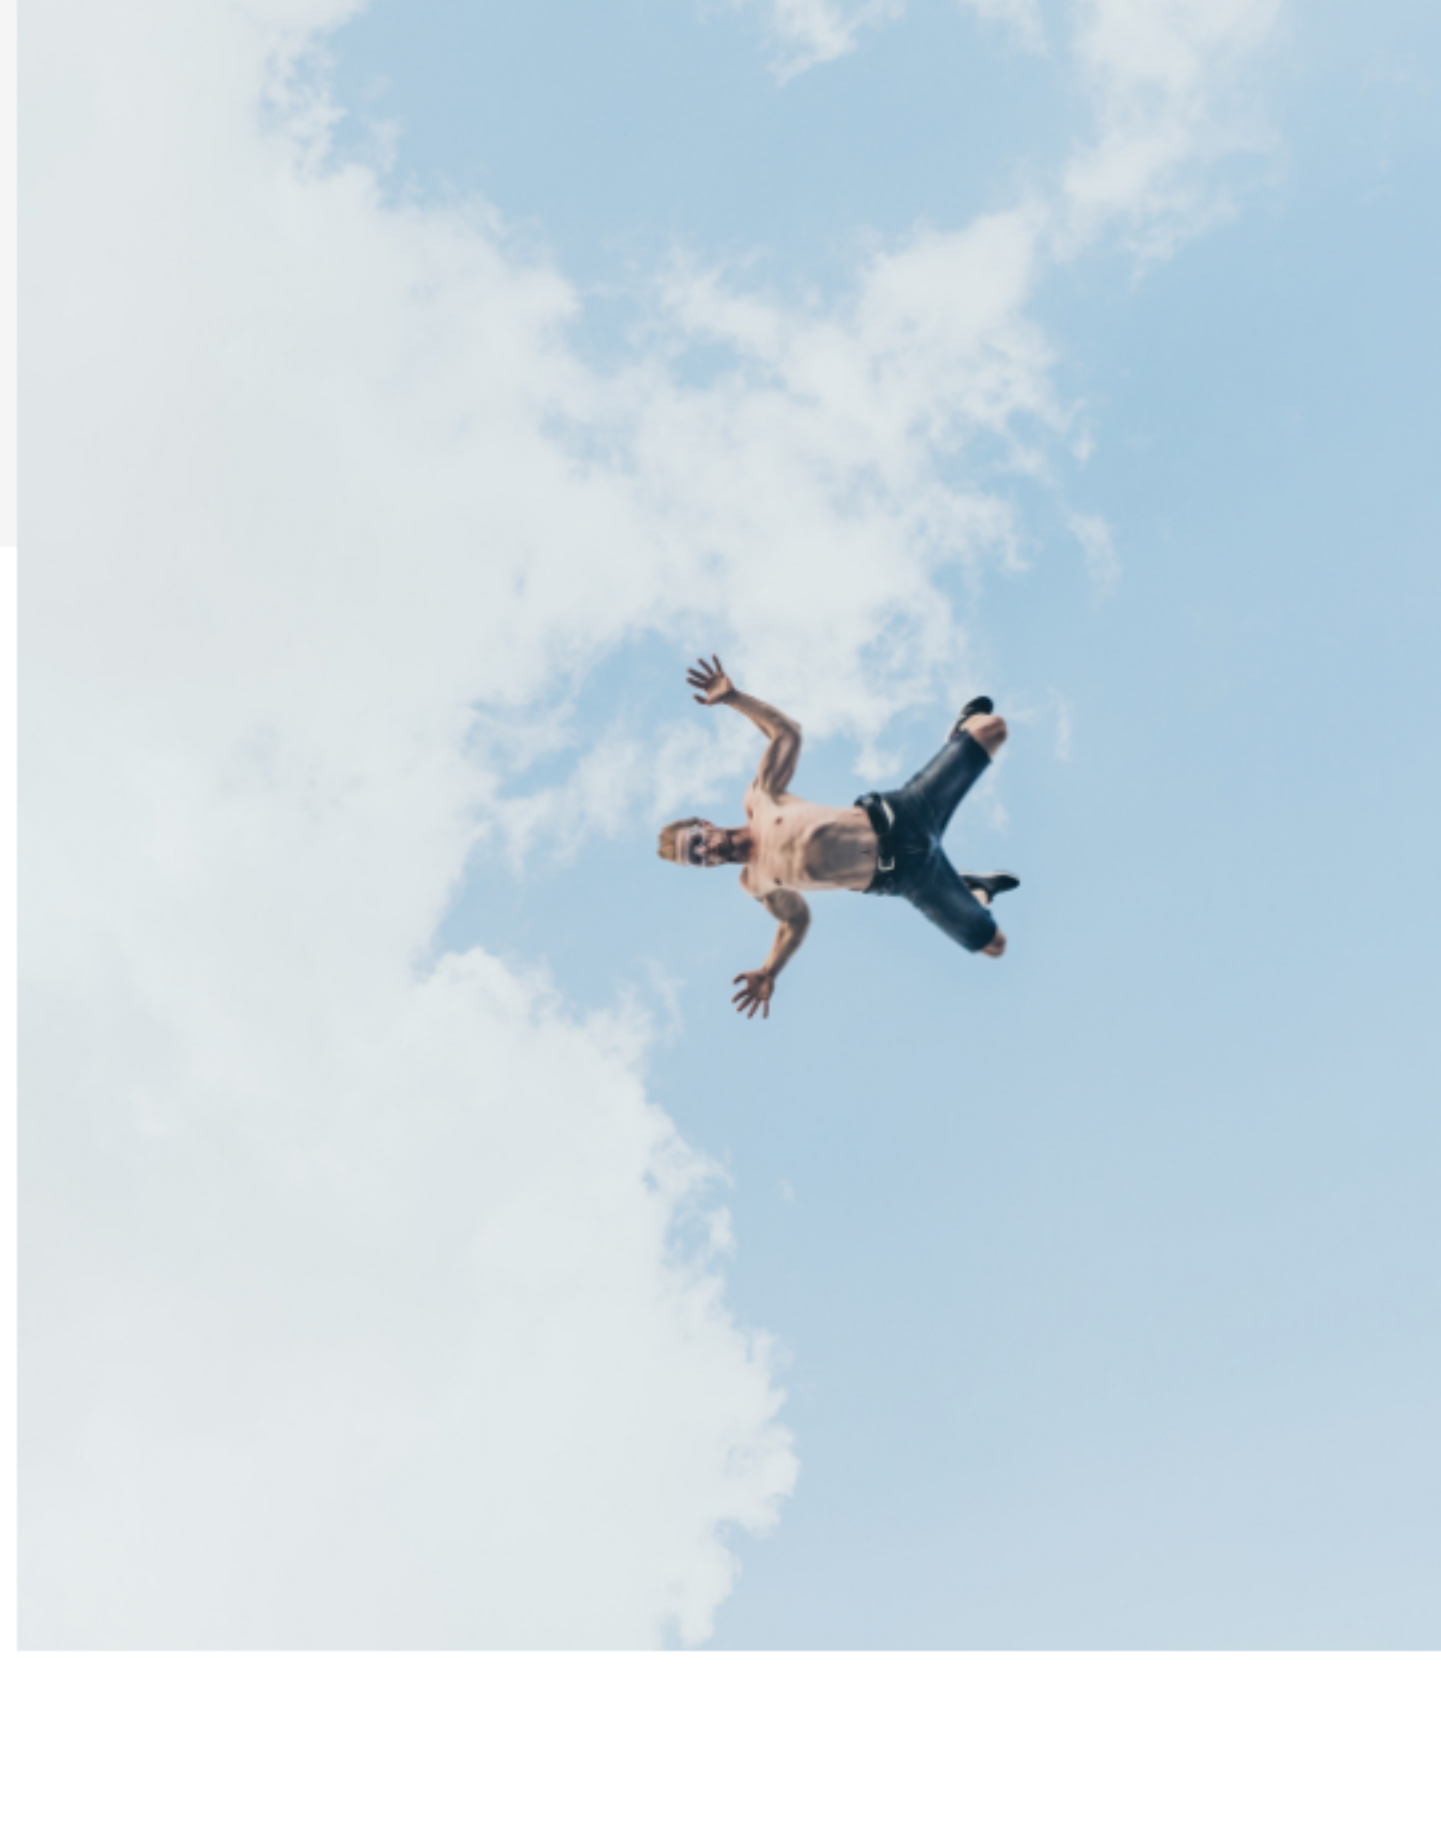

Open tunnels can also be a great tool to attract people to a specific location. It is **ideal for high footfall areas** where a permanent wind tunnel building may not be feasible, but a limited time attraction and show program can greatly boost public interest and attention.

ATTENTION MAGNET THANKS TO

## GREAT VISIBILITY

Open tunnels are the **best to communicate idea of flying**. In fact, they are the only option for show business and movie shooting.

If you happen to drive or walk by and see flying people in the air, you will be amazed. That is the reason why open-air tunnels are a **great attention grabber** for any business entity.

ABOVE THE GROUND, UNDER THE BLUE SKY:

## REALISTIC FLYING

When people think of flying or free fall, hardly anyone imagines floating inside a glass tube. **Authentic emotions** that one can get lifting up above the ground and flying under the blue sky are hard to compare.

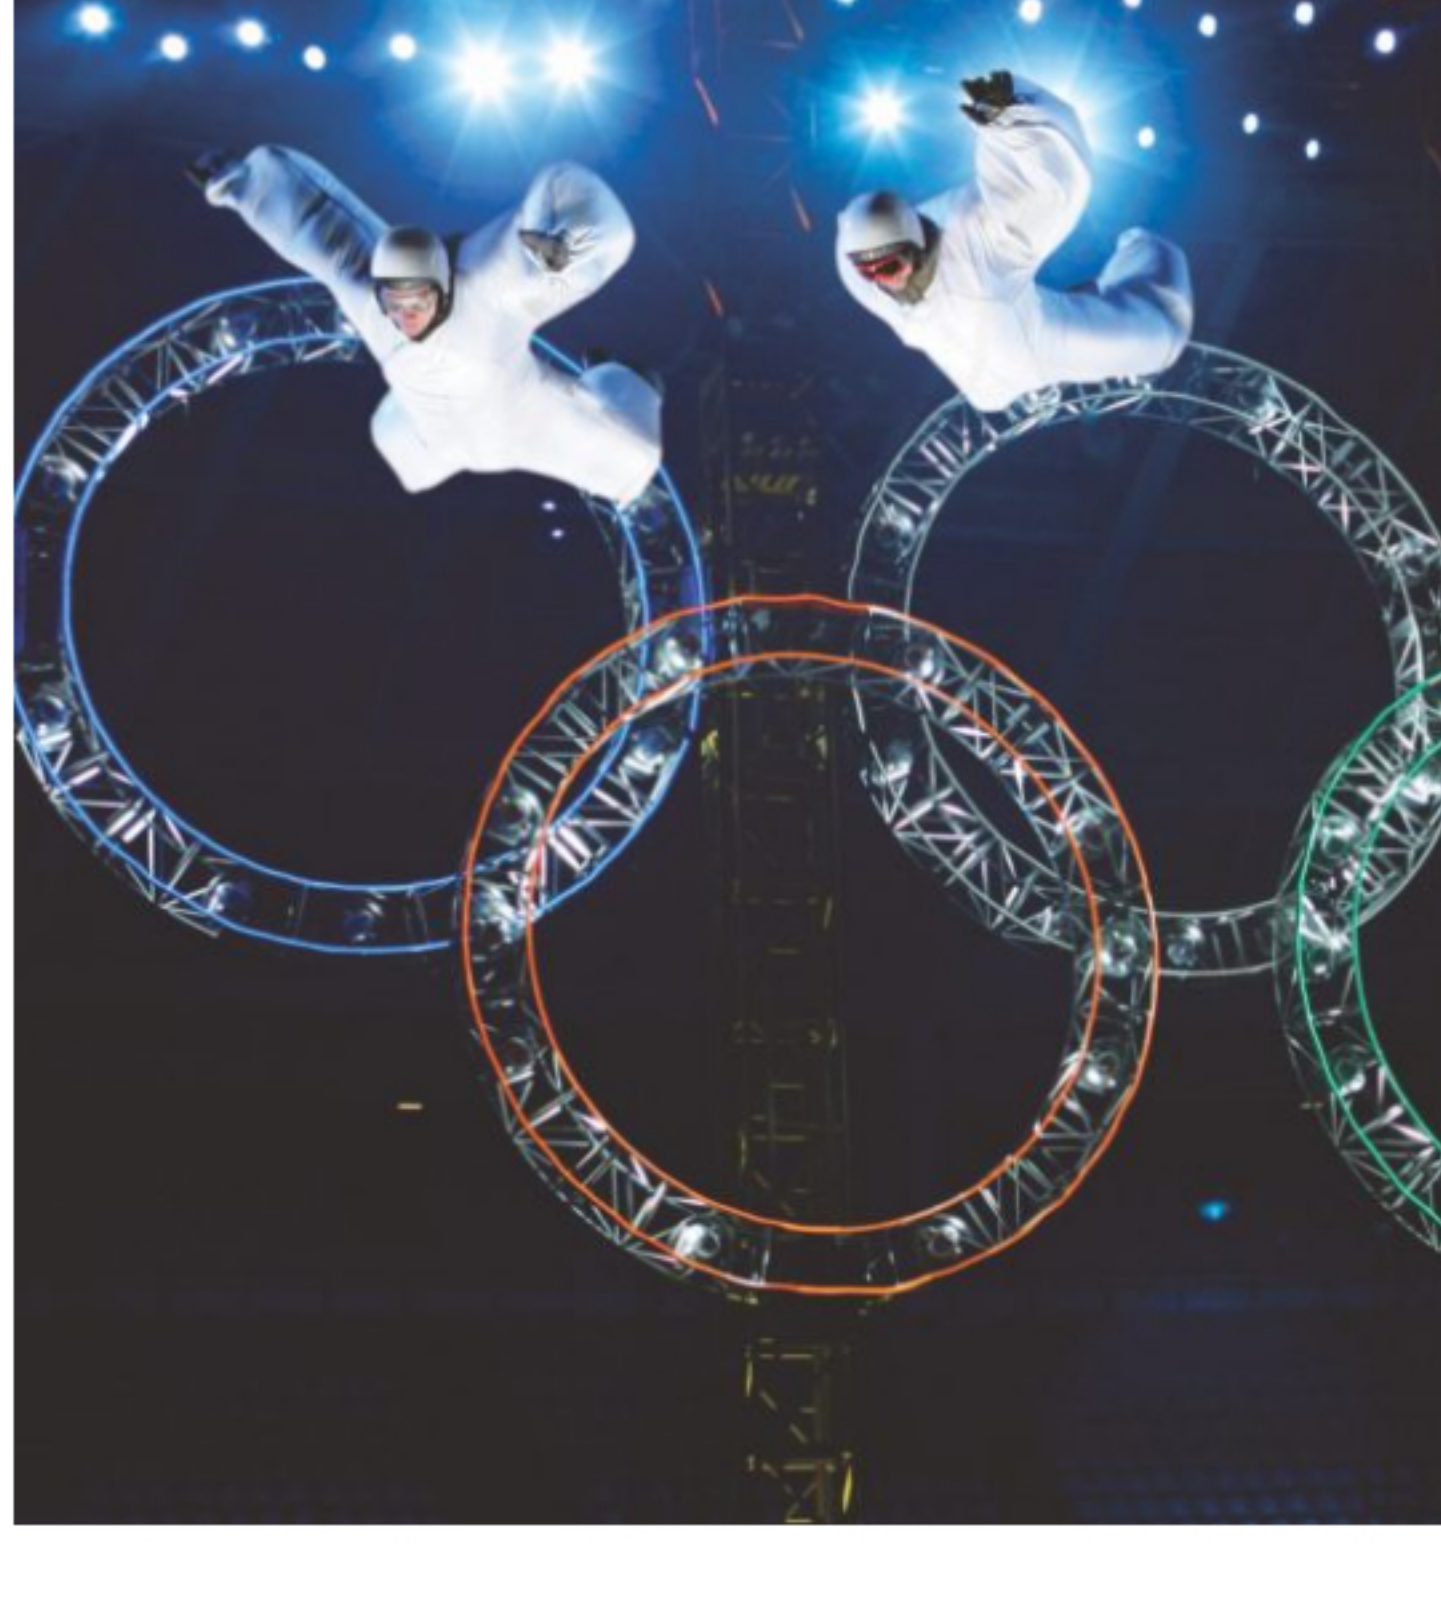

While jumping off a plane is too scary for many people to try, open air wind tunnels provide an excellent solution to experience emotions of flying. Lift your arms and let your body flow into a fresh breeze of air.

INDOOR SKYDIVING INDUSTRY'S

## WOW FACTOR

Over the last 15 years **open wind tunnels have played a key role** in promoting the bodyflying sports and in creating fascinating shows and performances that no other technology can offer.

Turin Winter Olympic games ceremony 2006, World EXPO 2010, Disneyland Shanghai 2015, Tom Cruise's "Mission Impossible: Fallout" movie in 2018; these are just a few examples where open tunnels have brought the WOW factor to the spectators.

Noise emission	79 dBA	65 dBA	65 dBA

Not ideal but will get the job done  Great fit!  Not suitable

## TECHNOLOGY

**Experience**

We are the most experienced company and our products are the Best you can buy for your money.

**SCADA System**

You will be able to see full tunnel operation history and control the tunnel remotely.

**Impact absorbing technology**

Our latest (2019) invention is "Impact Reduction System" to significantly improve safety of flyers in cases of high falls

**Fly Wheel technology**

A heavy steel hub for fan blades ensures higher air inertia in case of power outage, thus increasing flyer safety.

**Carbon fiber blades**

We use highly durable carbon blades that do not fatigue.

## BUSINESS

**Video and photo system**

Important for revenue stream – immediately prepared video and photo content with no direct production costs for you.

**IT and booking system**

To streamline business processes and eliminate manual labor.
